

# HARBORTOUCH SPECIFICATIONS

## RELIABLE ENGINEERING

Harbortouch POS has been designed to uphold high standards of quality and reliability in each terminal. Every Harbortouch terminal is able to withstand extreme heat and humidity as well as power fluctuations and radio interference. It is also built to resist water, oil, acids, dirt, and other foreign particles. The Harbortouch POS System will provide you with a reliable POS solution for years to come.

The internal workings of each Harbortouch terminal have also been painstakingly designed to bring you the ultimate POS solution. The processor utilized in the Harbortouch POS System boasts breakthrough technology that allows the processor to switch between ultra low power modes to full speed operation in a single clock cycle, resulting in consistent performance with no stutters.

## PRACTICAL DESIGN

Face to face communications is important in sales and customer service. That is why the Harbortouch terminal has been designed to allow your customer to see eye to eye with the cashier. Dressed in stylish black with sleek vertical lines, this POS system is a perfect sales traffic tool. Harbortouch has brought together maximum connectivity, simplified cable management, and an ultra-small footprint to offer a uniquely efficient POS solution.

## COOL PROCESSING

This terminal has been specially engineered and designed to handle airflow and provide optimal cooling with one main CPU fan. During warm-up, the fan will run at maximum capacity to clear the internal housing of dust and particles, and then will continue to run at a lower, quieter speed during normal operations. This unique method maximizes CPU cooling, while minimizing the amount of dust and debris that can build up inside a normal computer.

## GREEN FACTOR

Harbortouch products minimize your carbon footprint throughout the entire lifecycle of the product, starting with its carbon neutral manufacturing at the factory through its low energy usage at your location. The low voltage CPU provides optimal performance with minimal power consumption and heat output, allowing you to save money and the environment. Additionally, each terminal is fully RoHS and WEEE compliant.

## TOUCH SCREEN

The Harbortouch terminal stands out with its extremely durable, high clarity 15" touch screen interface. The ultra-thin screen edges effectively produce a picture-frame image that utilizes its size as efficiently as possible. This large display allows merchants to incorporate more speed keys on the screen and helps to reduce operator errors.

## EASY MAINTENANCE

Empower your technical staff with easy access to replaceable components, including hard disk drive, memory, and power supply. Without the use of a single tool, all major components of the terminal can be accessed and replaced in the field. Harbortouch will also provide onsite installation and extensive training and support to ensure that your terminal is always functioning at full performance.

### Terminal:

<b>CPU</b>	VIA C7® 1.5GHz, VIA CN700® Chipset - 533/400MHz FSB
<b>Memory</b>	1 GB Standard 2GB Maximum (2 Slots - DDR2 DIMM)
<b>Display</b>	15.1" TFT
<b>Resolution</b>	1024 x 768 (XGA)
<b>Brightness</b>	250 cd/m2
<b>Touch Panel</b>	5 Wire Resistive
<b>Hard Disk Drive</b>	40GB Standard (3.5") Serial ATA
<b>Magnetic Card Reader</b>	Standard (ISO Track 1,2,3)
<b>Router and Firewall</b>	4-port, 10/100 Mbps
<b>Receipt Printer</b>	Thermal, high speed (8.5" per second), low noise, two-color
<b>Cash Drawer</b>	Full Size - 5 bill and 5 coin trays with media slot

### Options:

<b>Customer Display</b>	2 line x 20 column VFD
<b>Kitchen Printer</b>	Dot Matrix
<b>Kitchen Video</b>	15" LCD Flat Panel Monitor w/ Stainless Steel Bump Pad
<b>Scanners</b>	Omnidirectional, Single Line Handheld, Wireless
<b>Keyboard</b>	PS2
<b>Mouse</b>	PS2
<b>Wireless Implementation</b>
